

## It's better to be green...

By converting to solar technology, you are an active part in **saving our planet**. Solar power reduces pollution and minimizes greenhouse gas emissions, reducing the effects of global warming. Together, we will also decrease our dependency on foreign oil and diminish the depletion of our non-renewable natural resources.

## This is going to be easy...

Producing your own electricity used to seem like a fantasy. Now it is very real. With minimal investment and a staff of goal oriented professionals behind you, you can help keep the planet green while saving significantly on your electric bill.

**It's easier than you thought possible...**

# SOLAR POWER

## Change is good...

Especially when it is an upgrade in your lifestyle. Switching from conventional electricity to solar electricity will significantly **reduce or eliminate your electric bill.**

There are other ways you may benefit as well. A new solar array is a constructive addition to your home and will increase its value. Solar modules can increase the life of your roof by adding an extra layer of protection. And, of course, you will no longer be subject to substantial utility rate increases.

## Play your part...

Aside from enjoying your new lower electric bill, responsibility and maintenance of your system is minimal. Solar has become increasingly affordable. You can purchase a system outright or you can lease a system. **It's a great time to go green!**

**CALL TODAY FOR A FREE CONSULTATION!**

Let our experts show you how you can save on electricity and **EARN** money through government incentives and the SREC program!

## Your Investment

Although you may purchase your system, you may not have the funds available to invest. For this reason we offer our **leasing program**. With minimal out of pocket expense, you can join the thousands of NJ residents looking towards the future.

## Part of the community

At Garden State Solar we recognize that we are all a part of the new global community. In that spirit, we are motivated to help everyone who would like to convert to solar power.

**We believe it is our part to play.**
